

PocketWatt

YOUR ENERGY EFFICIENCY GUIDE

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 696081

Buying energy-efficient, cost-effective appliances has never been easier

Are you looking to buy an electrical appliance?

Want to know how much it could add to your electricity bills, and how much energy it uses?

PocketWatt will help you save money while making the right choice for the environment!

PocketWatt is a new, free web app that makes finding out how energy-efficient a product is simple, and explains why it matters.
